DETAILED ACTION

In response to the communication filed on February 11, 2004, claims 1-2 are active in this application.

Priority

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 10/265,616, filed on October 8, 2002.

Information Disclosure Statement

The information disclosure statement filed on February 11, 2004 has been considered IN PART.

Oath/Declaration

Oath/Declaration filed on February 11, 2004 has been considered.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Re claim 2, line 1, the phrase “the lower layer” lacks antecedent basis.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Ku et al., U.S./6,528,363 B2.

Ku et al. disclose a method for forming a conductive wire (notched gate) of a semiconductor device, which comprises etching a lower portion of a side wall of a silicon layer 14 pattern based on a difference of etching selectivities between a silicon layer and a lower film 12 (fig 6); and forming a T-shaped conductive wire 14 based on the silicon layer pattern, see figs. 1-6; cols. 1-8 for more details (with respect to claim 2, Ku et al. inherently show the etching

selectivity since the material for the lower film and the conductive wire of the instant claim is the same as Ku et al.).
